INDEX to Volume 64

July 1982, pages 1-112 **August,** 113-208 **September,** 209-304
October, 305-400 **November,** 401-512 **December,** 513-624

Titles

Alert for Astronomers: 1984 Is Coming, *P. K. Seidelmann* and *G. H. Kaplan*, 409
Amateur Space Telescope, An, *Robert J. Sawyer*, 127
Amazing Olympus Mons, The, *J. Kelly Beatty*, 420
Asia in Space, *Andrew Chaikin*, 326
Astronomy on Ice, *J. Harvey, M. Pomerantz*, and *T. Duvall, Jr.*, 520
Aurora, The: New Light on an Old Subject, *S.-I. Akasofu*, 534
Barnard and His Observations of Io, *R. F. Griffin*, 428
Barnard's Satellite of Jupiter, *Dale P. Cruikshank*, 220
Black Heart of the Milky Way, The, *Leif J. Robinson*, 133
Comet Halley Found, *Dennis di Cicco*, 551
Craig Telescope of 1852, The, *Duncan Steel*, 12
Darkness at Noon, 30
Did the Perseids Peak in 1980? *John A. Russell*, 10
Eta Carinae's Numbered Days, *Nolan R. Walborn, Theodore R. Gull*, and *Kris Davidson*, 16
How Accurate *Is* the Gregorian Calendar? *Charles Kluepfel*, 417
Images of Other Worlds, *Andrew Chaikin*, 423
International Space Arena, The, *Kenneth Gatland*, 323
Interview with James M. Beggs, An, 332
Interview with T. Keith Glennan, An, 330
Iraq's New National Observatory, *Bart J. Bok*, 33
"Jupiter Effect," The — Maybe Good from Bad, *Leif J. Robinson*, 15 (reply, 405)
Jupiter "Without a Visible Satellite," *Roger W. Sinnot*, 214
Keeler's Gap in Saturn's A Ring, *Donald E. Osterbrock* and *Dale P. Cruikshank*, 123
Laboratory Exercises in Astronomy — The Rotation of the Sun, *Owen Gingerich* and *Richard Tresch-Fienberg*, 433 (correction, 533)
Lessons Learned: Americans in Space, *Eugene Kranz*, 313
Lick Observatory's Chile Station, *Remington P. S. Stone*, May, 1982; correction, 213
Luigi Lilio and the Gregorian Reform of the Calendar, *Gordon Moyer*, 418
Moussaka, Retsina, and the IAU, *Leif J. Robinson*, 406
NASA and the Planetary Imperative, *James A. Van Allen*, 320
New Ocean of Space, *Harrison "Jack" Schmitt*, 327
No Maunder Minimum? *Leif J. Robinson*, 234
Opinautics: A Matter of Much Gravity, *Eric Sheldon*, 118
Orion's Stellar Nursery, *Leif J. Robinson*, 430
Perspectives on Space Astronomy, *Jesse L. Greenstein*, 317
Probing the Radio Sun, *M. R. Kundu*, 6
Radio Astronomy's Golden Anniversary, *Woodruff T. Sullivan, III*, 544
R Aquarii: An Extraordinary Variable Star, *James B. Kaler*, 141
Satellite Observations of Cataclysmic Variables, *Keith O. Mason* and *France A. Cordova*, 25
Soviet Astronomy Today: A Personal View, *Leif J. Robinson*, 518
"Space Age" (25 Years and Counting), The, *J. Kelly Beatty*, 310
Space Shuttle's Uncertain Environment, The, *Andrew Chaikin*, 527
Summerful of Space Flights, A, *Andrew Chaikin*, 232
Sunspot Numbers and Solar Cycles, *Steven G. Wallenhorst*, 234
Surveying Velocity Fields in Galaxies, *G. de Vaucouleurs*, November, 1981; corrections to, 213
Venus 1882: Public, Parallax, and HNR, *David H. DeVorkin*, 524
Wanderings of a 25-inch Refractor, The, *D. Dialetis, N. Matsopoulos*, and *Th. Prokakis*, 136
Wisconsin's Teaching Observatory, *Warren Campbell*, 231
ZZ Ceti Stars: Variable White Dwarfs, *Donald E. Winget* and *Hugh M. Van Horn*, 216

Authors

Akasofu, S.-I., The Aurora: New Light on an Old Subject, 534
Anderson, Peter E., amateur observatory report, 586
Andrew, Bryan, book review, 446
Archer, Don, letter, 533
Barnwell, G. C., letter, 309
Barrett, Michael F., letter, 213
Batson, R. M., book review, 557
Beatty, J. Kelly, Amazing Olympus Mons, The, 420
"Space Age" (25 Years and Counting), The, 310
Black, Lawrence M., letter, 14
Block, David L., book review, 344
Bok, Bart J., Iraq's New National Observatory, 33
Bortle, John E., Comet Digest, 102, 198, 294, 397, 504, 615
Botley, Cicely M., letter, 309
Brody, Judit, and *Graeme Fyffe*, letter, 405
Brown, R. Hamilton, and *D. P. Cruikshank*, letter, 309
Burke, James D., book review, 241
Butler, Norman P., 6-inch Cassegrain Binoculars, 490
Campbell, Warren, Wisconsin's Teaching Observatory, 231
Catlin, Kenneth G., letter, 309
Chaikin, Andrew, Asia in Space, 326
Images of Other Worlds, 423
Space Shuttle's Uncertain Environment, The, 527
Summerful of Space Flights, A, 232
Cook, Michael J., amateur observatory report, 587
Cooke, Donald Alan, letter, 5
Cordova, France A., see *Mason, Keith O.*
Cruikshank, Dale P., Barnard's Satellite of Jupiter, 220
letter, 517
see also *Brown, R. Hamilton; Osterbrock, Donald E.*
Davidson, Kris, see *Walborn, Nolan R.*
Delsemme, A. H., book review, 553
de Vaucouleurs, G., Surveying Velocity Fields in Galaxies, November, 1981; corrections to, 213
DeVorkin, David H., Venus 1882: Public, Parallax, and HNR, 524
Dialetis, D., N. Matsopoulos, and *Th. Prokakis*, The Wanderings of a 25-inch Refractor, 136
di Cicco, Dennis, Comet Halley Found, 551
Riverside '82: A Year for Big Telescopes, 183
Stellafane '82, 472
Dobbin, James W., Jr., Telescope Parameters from a Handy Graph, 91
Dozier, George S., amateur observatory report, 587
Dunham, David W., The Lunar Eclipse: Shades of '63, 574
Duvall, T., Jr., see *Harvey, J.*
Dyck, Gerald P., amateur observatory report, 585
Eddy, John A., letter, 517
Eicher, David J., book review, 340
Ernest, Orien A., A Film Tester for Deep-Sky Photography, 104
Everhart, Edgar, Constructing a Measuring Engine, 279
Feibelman, Walter A., book review, 41
Foukal, Peter, book review, 245
Fyffe, Graeme, see *Brody, Judit*
Gatland, Kenneth, The International Space Arena, 323
Gerharz, Reinhold, letter, 5
Gething, P. J. D., letter, 5
Gingerich, Owen, Astronomical Scrapbook, 36, 138, 237, 530
book review, 240
Gingerich, Owen, and *Richard Tresch-Fienberg*, Laboratory Exercises in Astronomy — The Rotation of the Sun, 433 (correction, 533)
Glaser, Arthur, letter, 117
Goldsmith, Donald W., book review, 339
Gordon, Rodger W., letter, 309
Grebner, Arthur, Peoria's New 24-inch Telescope, 375
Greenstein, Jesse L., Perspectives on Space Astronomy, 317
Griffin, Roger F., Barnard and His Observations of Io, 428
Grillet, Jean Paul, letter, 533
Grossi, Mario D., letter, 117
Gull, Theodore R., see *Walborn, Nolan R.*
Hamkins, C. P., A Sundial That Tells Standard Time, 86
Harvey, J., M. Pomerantz, and *T. Duvall, Jr.*, Astronomy on Ice, 520
Heiser, A., letter, 438
Hicks, Robert D., III, book review, 144
Houston, Walter Scott, Deep-Sky Wonders, 101, 195, 291, 395, 500, 612
Huling, John, Jr., letter, 14
Joffe, Howard, letter, 405
Kaler, James B., R Aquarii: An Extraordinary Variable Star, 141
Kaplan, G. H., see *Seidelmann, P. K.*
Katz, Daniel E., letter, 5
Kluepfel, Charles, How Accurate *Is* the Gregorian Calendar? 417
Kranz, Eugene, Lessons Learned: Americans in Space, 313
Kraushaar, William L., book review, 445
Kundu, M. R., Probing the Radio Sun, 6
Lacroix, D. P., Stellar Spectra the Easy Way, 99
Lampton, Michael, book review, 45
Larson, Stephen M., letter, 405
Lorber, Richard D., letter, 309
Lovi, George, book review, 442
Rambling Through . . . (current month) Skies, 55, 159, 254 (correction, 456), 351, 455, 565
Mandler, Rudolf, Stands for Binoculars, 89
Marlett, Margaret M., letter, 533
Marschall, Laurence A., book reviews, 145, 555
Marsden, Brian G., How To Reduce Plate Measurements, 284
Martin, Wesley K., A Vote from Spokane: Make It Yourself! 601
Mason, Keith O., and *France A. Cordova*, Satellite Observations of Cataclysmic Variables, 25
Matsopoulos, N., see *Dialetis, D.*
Matsumoto, Tatsuro, A Simple Mirror System for Binoculars, 488
Mermilliod, J.-C., book review, 554
Michaelis, Anthony R., letter, 117
Miller, Frank A., letter, 117
Milon, Dennis, League's Peoria Convention, The, 368
Texas Star Party, The, 176
Moeschl, Richard, letter, 5
Moore, T. E., and *R. L. Arnoldy*, letter, 213
Morris, Charles S., book review, 44
Moyer, Gordon, letter, 14
Luigi Lilio and the Gregorian Reform of the Calendar, 418
Nordley, Gerald D., letter, 517
Ohanian, Hans C., An Analemmatic Sundial at Union College, 486
O'Meara, Stephen J., Astronomy Day — 1982, 272

Osterbrock, Donald E., and *Dale P. Cruikshank*, Keeler's Gap in Saturn's A Ring, 123
Page, Thornton, book reviews, 146, 444
Pansecchi, Luigi, letter, 438
Phelps, John D., Jr., letter, 438
Pieters, Carle M., book review, 441
Pilcher, Frederick, Does 9 Metis Have a Satellite? 164
Plavec, Mirek J., book review, 244
Pomerantz, M., see *Harvey, J.*
Prokakis, Th., see *Dialetis, D.*
Rast, Richard H., letter, 117
Reed, Steve, amateur observatory report, 585
Reidhead, Sarah J., letter, 117
Reiland, Tom, letter, 5
Richter, John L., The Acme Telescope, 598
Rizzo, Patrick V., book review, 150
Robinson, Leif J., Black Heart of the Milky Way, 133
book reviews, 42, 338
book reviews, 42, 338
"Jupiter Effect," The — Maybe Good from Bad, 15 (reply, 405)
Moussaka, Retsina, and the IAU, 406
No Maunder Minimum? 234
Orion's Stellar Nursery, 430
Soviet Astronomy Today: A Personal View, 518
Rollinson, John, letter, 405
Russell, John A., Did the Perseids Peak in 1980? 10
Sawyer, Robert J., An Amateur Space Telescope, 127
Schmitt, Harrison "Jack," The New Ocean of Space, 327
Schur, Chris, The Zodiacal Light in Color, 199
Seidelmann, P. K., and *G. H. Kaplan*, Alert for Astronomers: 1984 Is Coming, 409
Shawcross, William E., book review, 242
Sheehan, William, letter, 517
Sheldon, Eric, Opinautics: A Matter of Much Gravity, 118
Sinnott, Roger W., Jupiter "Without a Visible Satellite," 214
Optics and the "Golden Ratio," 380
What Size the Umbra? 618
Smith, David L., You Can Take It with You, 200
Spooner, Michael V., A Null Test for Cassegrain Secondaries, 188
Spratt, C. E., letter, 405
Steel, Duncan, The Craig Telescope of 1852, 12
Steffey, Philip C., letters, 213, 405, 517
Stone, Remington P. S., Lick Observatory's Chile Station, May, 1982; correction to, 213
Sullivan, Woodruff T., III, Radio Astronomy's Golden Anniversary, 544
Tresch-Fienberg, Richard, see *Gingerich, Owen*
Trimble, Virginia, book review, 342
Van Allen, James A., NASA and the Planetary Imperative, 320
Van Horn, Hugh M., see *Winget, Donald E.*
Verseau, René, letter, 14
Victor, Robert C., Sun, Moon, and Planets This Month, 58, 162, 258, 354, 458, 572
Walborn, Nolan R., Theodore R. Gull, and *Kris Davidson*, Eta Carinae's Numbered Days, 16
Wallenhorst, Steven G., Sunspot Numbers and Solar Cycles, 234
Weedman, Daniel W., book review, 442
Whitaker, Ewen A., book review, 148
Williams, David B., letter, 517
Winget, Donald E., and *Hugh M. Van Horn*, ZZ Ceti Stars: Variable White Dwarfs, 216
Zirker, Jack B., book review, 40

Departments and Features

Amateur Astronomers —
Astronomy Day — 1982, 272
Calendar of Events and Potpourri, 72
Five Amateur Observatories, 585
League's Peoria Convention, The, 368
1983 Solar Eclipse Tours, 371
Stellafane '82, 472
Texas Star Party, The, 176

Astronomical Scrapbook —
Dreyer and Tycho's World System, 138
Great Comet and the "Carte," The, 237
Notes on the Gregorian Calendar Reform, 530
Search for Russell's Original Diagram, A, 36

Books and the Sky —
Astronomy for the Inquiring Mind, Eric M. Rogers, 442
At the Crossroads of the Earth and the Sky, Gary Urton, 242
Black Holes, Walter Sullivan, 344
Catalogue of Star Clusters and Associations: Supplement 1, J. Ruprecht, B. Balazs, and R. E. White, 554
Comets and the Origin of Life, Cyril Ponnamperuma, editor, 446
Complete Manual of Amateur Astronomy, A, P. Clay Sherrod, 41
Cosmic Dawn, Eric Chaisson, 339
Cosmic Discovery, Martin Harwit, 42
Fire of Life, Smithsonian Institution, 40
First Stargazers, The, James Cornell, 144
Gamma Ray Astrophysics, Carl E. Fichtel and Jacob I. Trombka, 445
Gravity, Black Holes and the Universe, Iain Nicolson, 344
Horizons: Exploring the Universe, Michael A. Seeds, 145
In the Light of the Sun, Mark Washburn, 245
Introduction to Comets, John C. Brandt and Robert D. Chapman, 553
Jupiter, Garry Hunt and Patrick Moore, 557
Life in the Universe, John Billingham, editor, 146
Make-It-Yourself Nocturnal, Carole Stott, 240
Moon, The, Patrick Moore, 557
Moon, The — Our Sister Planet, Peter H. Cadogan, 148
Mysteries of the Universe, Nigel Henbest, 150
Nature of Matter, The, J. H. Mulvey, editor, 555
Our Turbulent Sun, Kendrick Frazier, 338
Photometric and Spectroscopic Binary Systems, Ellen B. Carling and Zdenek Kopal, editors, 244
Physical Universe, The, Frank H. Shu, 342
Planetary Science: A Lunar Perspective, Stuart Ross Taylor, 444
Revealing the Universe, James Cornell and Alan P. Lightman, editors, 442
Sky Catalogue 2000.0, Vol. 1: Stars to Magnitude 8.0, Alan Hirshfeld and Roger W. Sinnott, editors, 44
Stages to Saturn, Roger E. Bilstein, 241
Surface of Mars, The, Michael H. Carr, 441
Webb Society Deep-Sky Observer's Handbook, Vol. 4: Galaxies, Kenneth Glyn Jones, editor, 340
X-Ray Astronomy, J. Leonard Culhane and Peter W. Sanford, 45

Celestial Calendar —
Busiest Month of the Year! The, 60
Does 9 Metis Have a Satellite? 164
How Many Stars in the Square of Pegasus? 460
Interesting Double and Triple Stars, 260
Lunar Eclipse, The: Shades of '63, 574
Meteors, 165, 356, 461, 576
Minima of Algol, 62, 166, 262, 357, 462, 576
Mystery in Monoceros, 356
Occultation Notes, 460
Occultation Reminder, 261
Partial Solar Eclipse, 576
Variable Star Maxima, 62, 166, 262, 357, 462, 576
V Cassiopeiae, 357

50 and 25 Years Ago, 14, 117, 239, 438, 543

Front-cover photographs —
Black Hole Vista, 113
Eclipse over Paris, 401
Gulf of Suez, 1
Observing Station at the South Pole, 513
Sputnik 1, 305
Summer's Lunar Eclipse, 209

Gleanings for ATM's —
Acme Telescope, The, 598
Analemmatic Sundial at Union College, An, 486
Constructing a Measuring Engine, 279
How To Reduce Plate Measurements, 284
Null Test for Cassegrain Secondaries, A, 188
Optics and the "Golden Ratio," 380
Peoria's New 24-inch Telescope, 375
Riverside '82: A Year for Big Telescopes, 183
Simple Mirror System for Binoculars, A, 488
6-inch Cassegrain Binoculars, 490
Stands for Binoculars, 89
Sundial That Tells Standard Time, A, 86
Telescope Parameters from a Handy Graph, 91
Timing the Sun, 88
Vote from Spokane, A: Make It Yourself! 601

Letters, 5, 117, 213, 309, 405, 517

New Books Received, 46, 151, 246, 345, 448, 558

News Notes —
AAS Awards, 543
Bok Astronomy Awards, 416
Bright Compact Galaxy Found in Ursa Major, 229
British Astronomers Look South, 543
Centaurus-A Enigma, The, 226
Chance Discovery of an Extragalactic Star Cluster, 226
Cometlike Solar Surge, 334
Comet Tempel-Tuttle and the Leonids, 414
Conestoga 1 Launch, 416
Doing the NASA Shuffle, 18
Elemental Abundances: What is Normal? 335
Facelift for the 36-footer, 334
First Host of "Today," 335
First Quasar Yields Another Secret, 129
Fullam Award, 413
Giant Halo Around Quasar, 542
Guggenheim Fellowship, 538
Herschel Concert, 416
History of the Interstellar Medium in Tiny Stones? 18
Hottest White Dwarf, The, 225
How Things Spin, 228
IAU and Naming Stars, 229
Increasing Redshift, 20
In Search of Neptune's Ring, 131
"Is the Universe Rotating?" 540
Life Among the Lowly I: Faint, Cool, White Dwarfs, 20; II: Theoretical Limits, 21; III: The Winner Is . . . , 21
Magnetic Monopole: Found at Last? 336
Mass-Loss Bubble in the Large Magellanic Cloud, 22
Milky Way, The: A Twinkling Quasar, 539
Milky Way in Gamma Rays, The: COS B Results, 538
Minor Planet Names, 542
Mira Update, 17
Naming Mount Hamilton, 228
Neptune's Rotation, 18
Neutrino Rest Mass: Negative Results, 334
New Award, 129
New Criterion Owners, 225
Newest Landsat, The, 22
New Light on a Biological Mystery, 132
New 2.4-meter Telescope on Kitt Peak, 410
Observatories, The, 538
Odd Planetary Nebula Structures, 19
100-second Seyfert Galaxy, The, 411
Photographing Faint Satellites, 541
Planetary Nebulae in M31, 538
Resolving M87's Jet, 335
Ring and Its Fellowship, A, 17
Shell Nebula in NGC 55, 228
Size of Mira, 132
Solar Neutrinos: A Persistent Problem, 21
Spinning Asteroids, 22
Stalking the Shuttle, 225
Star Formation in Barred Spirals, 413
Tangled Skein, A: Emission Lines of EF Eridani, 414
Telescope Manufacturer Retires, 20
3C 345: A Far-Infrared Quasar, 416
Three New Catalogues, 132
Till the End of Time, 412
Tomorrow's Astronomers, 541
Too Much To Swallow? 542
T Tauri's Infrared Companion, 334
200-second Quasar, The, 412
Two More Sungrazing Comets, 337
2228 Soyuz-Apollo, 415
Uranus Update I: Rings, 227; II: Satellites, 227
Very Rich, Very Red, Very Distant, Very Normal Cluster of Galaxies, A, 130
Warp in M31, 230
Where Is Population III? 19
Whipple Observatory, 130
X-Rays and an Alternative Theory of Gravitation, 230

Observer's Page —
Comet Bowell and the Trifid Nebula, 617
Comet Digest, 102, 198, 294, 397, 504, 615

Deep-Sky Wonders, 101, 195, 291, 395, 500, 612
East Coast Fireball, An, 616
Film Tester for Deep-Sky Photography, A, 104
July's Partial Solar Eclipse, 503
More About July's Lunar Eclipse, 390
Newly Discovered Comet Austin, 1982g, 198
1982's Lunar Eclipses: Round 2, 296
Of April Lyrids and a Supernova, 106
Stellar Spectra the Easy Way, 99
Summer's Colorful Skies, 103
Sunspot Numbers, 101, 197, 295, 396, 502, 617
What Size the Umbra? 618
You Can Take It with You, 200
Zodiacal Light in Color, The, 199
Rambling Through . . . (current month) Skies, 55, 159, 254 (correction, 456), 351, 455, 565
Southern Stars, 158, 350, 564
Stars for . . . (current month), 56, 160, 256, 352, 456, 566
Sun, Moon, and Planets This Month, 58, 162, 258, 354, 458, 572
Jupiter's Satellites, 59, 163, 259, 573
Moon Phases and Distances, 59, 163, 259, 355, 459, 573

Selected Topics and Celestial Objects

This listing is not intended to be exhaustive and does not supplant the other parts of the index. For example, material in such regular features as Books and the Sky is ordinarily indexed only under the Departments and Features section.

Amateur astronomers: Astronomical League meets in Peoria, 368; Astronomical League's new address, 533; astronomical numismatics, 117; Astronomy Day 1982, 272; Stellafane, 472; Riverside, 183
Art: space art, 423
Asteroids: Metis, 164; names, 542; rotational statistics, 22; Soyuz-Apollo, 415
Astrometry: *Astrographic Catalogue,* 238; constructing a measuring engine, 279; history of stellar parallax, 255, 517; need for precise comet positions, 102, 283; reduction of plate measurements, 284, 405
Auroras: new models, 213, 534
Awards: AAS, 543; Bok award offered by Boston University, 416; Chrétien, 129; Dudley Observatory, 413; Warner's comet and meteorite, 224
Binoculars: Cassegrain 6-inch, 490; mirror system for, 488; stands, 89
Black holes: in galactic nucleus, 133; numerical characteristics, 120; opinautics, 118; properties, 121
Calendars: accuracy of Gregorian, 417; history of, 418, 530
Clusters: at galactic core, 134; infrared cluster in M42, 430; new extragalactic, 226. Globular — Omega Centauri, 179; M2, 101; M3, 5; M10, 195; M12, 195; M13, 291, 368; M14, 195; M15, 101, 395; NGC 228, 501; NGC 6366, 197; NGC 6517, 196; NGC 6535, 197; NGC 6539, 196; NGC 6723, 293. Open — Double, 613; Pleiades, 5, 612; IC 4756, 195; M34, 614; M52, 291; NGC 1245, 614; NGC 6834, 292
Comets: Halley recovered, 551; International Halley Watch, 102, 408; Kreutz sun-grazers, 294, 337; P/Swift-Tuttle, 102; P/Tempel-Tuttle, 414; Donati, 1858 VI, 102; Great September, 1882 II, 237, 294, 397; Howard-Koomen-Michels, 1979 XI, 337; Bowell, 1980b, 102, 617; P/Grigg-Skjellerup, 1982a, 102; P/d'Arrest, 1982e, 198, 397, 507, 615; P/Churyumov-Gerasimenko, 1982f, 198, 397, 507, 615; Austin, 1982g, 198, 295, 397, 438, 504, 615
Constellations: of American Indians, 351
Cosmology: contemporary, 409; fate of universe, 412; rotation of universe, 540
Double and multiple stars; Doolittle 3, 164; R Aquarii as binary, 143; Sirius, 213; some equilateral triples, 261, 517
Earth: photographed from space, 22, 321, 329
Eclipses: saros series, 5; solar eclipse tours, 371; July 5-6, 1982, total lunar, 296, 390, 618; July 20, 1982, solar, 61, 503; June 11, 1983, total solar, 30
Galaxies: asymmetry in M31, 230; distant cluster 0016 +16, 130; highest redshifts, 20; jet of M87, 335; Large Magellanic Cloud, 22; model of barred, 413; Polarissima, 291; processes in active, 29; Stephan's Quintet, 395; variable, 229; M31, 134, 230; M33, 293, 566, 612; M51, 185; M74, 501; M101, 176; NGC 55, 228; NGC 128, 501; NGC 470, 501; NGC 474, 501; NGC 5128, 226; NGC 5383, 413; NGC 6207, 292; NGC 6814, 411; NGC 6822, 292; NGC 7217, 395; NGC 7331, 395; NGC 7335, 396; NGC 7534, 502; NGC 7619, 395, 502; NGC 7626, 502; NGC 7741, 395
High-energy astronomy: from space, 317; galactic nucleus, 133; magnetic monopoles, 336; new gravity theory and X-ray bursters, 230; of variables, 26, 414; variable galaxy, 411; variable quasar, 412; H 2215 − 086, 29; H 2252 − 035, 29; 3U 1809+50, 28; 4U 1849−31, 29. Gamma-ray — galactic nucleus, 133; survey of Milky Way, 538
History: archaeoastronomy questioned, 405; Barnard's discovery of Jupiter V, 220, 438; Barnard's observations of Io, 428; *Carte du Ciel,* 237; Chaucer's astrolabe, 14; Chicago 1933 exposition, 117; Craig telescope, 12; Dearborn 18½-inch lens, 213; Dreyer and Tycho's world system, 138; Gregorian reform of calendar, 418; Hertzsprung-Russell diagram, 36; Lick Observatory, 123; Newall refractor, 136; observations of Saturn, 123; personal history of NASA, 313; radio astronomy, 544; refractor genealogy, 13; stellar parallax, 255; transits of Venus, 524
Infrared astronomy: images of galactic nucleus, 134; IRS 16, 134; NASA support of, 318; of M42, 430; of quasars, 416; of swallows, 542
International Astronomical Union: commissions and officers, 407; meeting in Greece, 406
Interstellar clouds: CCD I and 2, 134; H I ring, 17; H II in LMC, 22; obscuring the galactic nucleus, 133
Interstellar medium: its fossil history, 18
Jupiter: Barnard's discovery of JV, 220; without visible satellites, 214
Life, extraterrestrial: amino acids in meteorites, 132; IAU commission, 407
Light pollution: European, 14; in Jacksonville, Florida, 405
Mars: apparent brightness, 213; Olympus Mons, 420; photographs of, 370
Meteorites: amino acids in Murchison, 132
Meteors: fireball, 616; Leonids, 414; Lyrids, 106; Perseids, 10
Milky Way: as active galaxy, 133; color photography, 103; considered by American Indians, 352; mistaken for cloud, 55; nucleus of, 133
NASA: administrative changes, 18; creation, 310; cutbacks, 320; interview with J. M. Beggs, 332; interview with T. K. Glennan, 330; lessons learned in space, 313; maintenance of Landsat, 22; next decade, 310; planetary science, 320; planning of astronomy, 317; personal history of, 313
Nebulae: associated with R Aquarii, 141; associated with 3C 273, 129; Crab, 17; large loop in NGC 55, 228; planetary nebulae in M31, 538. Diffuse — California, 612; Cone, 5; Merope, 5, 565; Veil, 176; M8, 103, 176, 178; M16, 176; M17, 103, 176; M20, 103, 176; M42, 105, 430; Planetary — IC 289, 19; IC 5217, 500; NGC 40, 19; NGC 246, 500; NGC 650-51, 19; NGC 2346, 356; NGC 2371-72, 19; NGC 6543, 176; NGC 6804, 292; NGC 6842, 292, 500; NGC 7293, 565; NGC 7635, 291
Neptune: ring? 131; rotation, 18, 131, 309
Neutrinos: rest mass, 334; solar, 21
Observatories: Allegheny, 5; Athens National, 137; Calar Alto, 34; Chews Ridge, 17; Cloudcroft, 117; film describing six major, 538; Gateshead, 136; Iraq National, 33; Kitt Peak National, 410; Kuiper Airborne, 225; Lick, 123; McDonald, 176; Pico Veleta, 35; Skalnate Pleso, 61; University of Cambridge, 136; University of Wisconsin at River Falls, 231; Whipple, 130
Observatories, amateur and public: Brisbane, Australia, 586; Corona, Calif., 585; Corralitos, 370; Franklin Institute, 5; Lexington, Ky., 587; North Dartmouth, Mass., 585; Oshawa, Ont., 587; Peoria, Ill., 368
Occultations: by Neptune, 131
Optics: golden ratio, 380
Personal notes: Abetti, G., 409; Ambartsumian, V. A., 518; Ashbrook, J., 416; Bappu, M. K. V., 409; Garroway, D. C., 335; Johnson, T. J., 20; Russell, H. N., 525; Sacks, I., 309; Whipple, F. L., 130
Photography: Baker-Nunn cameras, 117; Milky Way, 103; missing rare plate, 5; stellar spectra, 99; tester for emulsions, 104
Planetariums: computer-controlled projector, 186; Fels, 5; Fiske, 73
Pluto: IR observations, 227
Pulsars: Crab, 17; Vela, 17; PSR 0740 − 28, 17
Quasars: associated giant halo, 542; normal galaxies as recurring quasars, 539; processes, 29; variable X-ray, 412; 3C 273, 129; 3C 345, 416
Radio astronomy: interferometry of galactic nucleus, 133; mobile VLBI, 14; new dish for NRAO 12-meter, 334; observations of distant galaxy cluster, 130; photographic history, 544; Sun, 6; VLA, 7
Saturn: fine features in A ring, 123, 309, 405, 517; semi-transparency of C ring, 224
Solar neighborhood: histogram of absolute magnitudes, 21; majority of red dwarfs, 255; missing mass, 21
Solar system: formation, 18
Space and spacecraft: amateur space telescope, 127; Apollo program, 315; Apollo-Soyuz, 316, 324; Ariane, 325; Asia in space, 326; business in space, 310; comets discovered by satellite, 337; Conestoga 1, 416; cutbacks in planetary science, 320; first walk, 323; Gemini, 314; GEODSS, 117; HEAO 2, 27; international space efforts, 323; IUE, 27; KAO observes Shuttle test flights, 225; Landsat, 22; lessons learned in, 313; Mercury astronauts, 313; new perspective from, 327; proposal of policy, 328; public opinion, 310; satellite tracking from Kenya, 309; septet in space, 438; Skylab, 316; space astronomy, 317; spacecraft for planetary science, 320; Space Shuttle, 316, 527; SPOT, 24, 312; Sputnik 1 and 2, 310; summerful of space flights, 232; timeline, 309-329; Uhuru, 26; UNISPACE '82, 310; VOIR, 333
Speckle interferometry: of Mira, 132
Spectroscopy: easy method for spectrophotography, 99; radial velocity, 160
Stars: Arcturus and 1933 Chicago Exposition, 117; chains of, 5; commercial naming of, 229; Eta Carinae, 16; faintest known, 21; formation, 430; hottest white dwarf, 225; metal-deficient, 20; Mira, 132; nearest, 254; number visible in Square of Pegasus, 460; proper, radial, and space motions, 159; red and black dwarfs, 21; Sirius, 213; straight line of 2nd- and 3rd-magnitude, 195; white dwarfs, 20
Sun: Maunder minimum, 234, 309, 517; radio observations, 6; rotation, 433; shrinking? 5; solar apex, 159; solar neutrinos, 21; solar parallax, 525, 526; solar seismology from Antarctica, 520; solar surge, 334; sunspot numbers and solar cycles, 234
Sundials: analemmatic, 486; formulas for design, 88; note on French 18th-century, 533; standard-time, 86; "Tower of the Winds," 530
Supernovae: association of pulsar with remnant, 17; in NGC 4490, 106; in NGC 6946, 179
Telescopes and telescope making: amateur space, 127; Baker-Nunn, 117; limitations of large aperture, 185; measuring engine, 279; MMT, 130; null test for Cassegrain secondaries, 188; parameters from graph, 91; refractor genealogy, 13; spectrograph for Lick 120-inch, 228; survey of commercial, 370; symmetrical wooden mounting, 601; 9.6-inch Acme, 598; 18½-inch Dearborn, 213; 24-inch Craig, 12; 25-inch Newall, 136; 36-inch Lick, 123; 48-inch UK Schmidt, 543; 74-inch South African, 543; 2.4-meter KPNO, 410; 2.4-meter Space Telescope, 319, 333; 107-inch McDonald, 179; 4-meter Anglo-Australian, 543
Ultraviolet astronomy: extreme UV, 29; variables, 27
Uranus: satellites, 227; study of rings by occultation, 227
Variable stars: RS Canum Venaticorum type, 370; cataclysmic, 25; ZZ Ceti stars, 216; R Aquarii, 141; Epsilon Aurigae, 60; V Cassiopeiae, 357; Omicron Ceti, 61, 132; SS Cygni, 26; EF Eridani, 414; U Geminorum, 26; AM Herculis, 28, 414; EX Hydrae, 26; VV Puppis, 414; T Tauri, 334; RW Trianguli, 28; UX Ursae Majoris, 28; AN Ursae Majoris, 414; BE Ursae Majoris, 225; TW Virginis, 28
Venus: the 1882 transit, 524
X-ray astronomy: see High-energy astronomy
Zodiacal light: in color, 199
